

RIGHT GIN

Right gin is a citrus forward, new western style gin conceived by Lyons Brown. Blended and made in Malmo, Sweden; the southernmost region of the country, directly across the bridge from Copenhagen, Denmark by master blender Henrik Facile. Right works exceptionally well in classic gin cocktails, taken neat, and pairs beautifully with fresh and seasonal flavors. Blended and bottled in 60% of gin is water, so the selection of this ingredient is critical. Our water comes from lake Bolmen, near Malmo, a protected source renowned for its arctic purity. We chose it for its “softness” which we believe adds to the flavor profile of our gin.

Gin

Consistent with the original formula, each of the eight botanicals used are carefully sourced for their distinctive flavor profile, distilled separately under specific conditions for that particular botanical, then blended together to create an elegant, balanced and unique expression of Gin. 53% of Right Gin is water, so the selection of this ingredient is critical.

Botanicals:

- Juniper Berry
- Sarawak Black Pepper
- Coriander Leaf
- Lemon Peel
- Bergamot
- Green Cardamom
- Key Lime Peel
- Bitter Orange Peel
