

# PORTER'S GIN

**Year Founded:** 2015

**Region:** Aberdeen, Scotland

**Founder(s):** Alex, Ben & Josh

**Fun Fact:** Porter's Gin uses vacuum distillation to retain light and natural flavors that would otherwise be "cooked" by pot-distilling and therefore irreversibly damaged.

**Fun Fact #2:** Currently the only gin being produced in Aberdeen!

Creating better drinks has always been our passion so we built a forward thinking micro-distillery in the basement of a cocktail bar in Aberdeen, Scotland. Through consultation with scientists from Aberdeen University, we built a vacuum still capable of distilling at much lower temperatures to avoid damaging delicate botanicals. The resulting liquid captures light and natural flavors from delicate ingredients which we pair with a juniper-forward recipe from one of the oldest distilleries in the UK. A few years down the line and we now have three vacuum stills to meet the precise standards for our cold distillates. Our gins respect tradition whilst innovating, capturing new profiles from a mix of contemporary and classic distillation. We hope you enjoy them as much as we did making them.

## Porter's Modern Classic Gin

Classic gin elevated by cold-distilled Buddha's Hand Citron

Juniper-led with a bright citrus profile, perfect for lighter drink

Best served in a London Calling cocktail or in a G&T with lime

41.5% abv

Made from 100% British wheat

## Porter's Tropical Old Tom Gin

Old Tom Gin with pronounced fruitiness from cold-distilled passion fruit, guava and white tea

Slightly sweetened producing a richer spirit fitting to the tropical profile

Best served in a dry martini with a twist or in a G&T with fresh passion fruit

40% abv

Made from 100% British wheat

## Porter's Orchard Gin

---

Born out of our love for the flavor profiles of great-tasting French wines (and in particular Blanc de Blanc Champagne), our latest expression, Orchard, takes inspiration from Champagne's Chardonnay grape and its intense fruitiness. So named because we use cold-distilled green apples and pears with our classic juniper base. We then use a soybean distillate to give the gin its sophisticated butter and biscuit tasting notes.

Enjoy as a classic G&T garnished with a slice of apple, or in a twist on the French 75 cocktail

40% abv

Made from 100% British wheat
